KeePass
Emergency Sheet

22/11/2020

Database file:

C:\Users\esdan\Desktop\org-kee-pass\Credentials\Main.kdbx

You should regularly create a backup of the database file (onto an independent data storage device). Backups are stored here:

Master Key

The master key for this database file consists of the following components:

- **Master password:**

  mainpassword

Instructions and General Information

- A KeePass emergency sheet contains all important information that is required to open your database. It should be printed, filled out and stored in a secure location, where only you and possibly a few other people that you trust have access to.

- If you lose the database file or any of the master key components (or forget the composition), all data stored in the database is lost. KeePass does not have any built-in file backup functionality. There is no backdoor and no universal key that can open your database.

- The latest KeePass version can be found on the KeePass website: https://keepass.info/.
